COVID-19 Test Result Summary

NEGATIVE

The Analytic Specificity of this test is highly specific as determined by the BLAST analysis against the known positive and negative sequences and the Analytic Sensitivity of this test is 100% above the Limit of Detection of 5 copies/mL as determined by the serial dilution method.

Disposals and Detection Methodology

Paradigm Laboratories uses magnetic bead technology to remove RNA and DNA from virus and bacteria samples. Real time PCR is performed using fluorescent 5-nucleotide primers for detection. The COVID-19 (SARS-CoV-2) assay utilizes RT-PCR for the qualitative detection of nucleic acid from SARS-CoV-2.

Disclaimer: The test was developed and validated using a bridging study to EUA-authorized assay by Paradigm Laboratories in accordance with the FDA's Guidance Document Policy for Diagnostic Testing in Laboratories Certified to Perform High Complexity Testing under CLIA prior to Emergency Use Authorization for Coronavirus Disease 2019 during the Public Health Emergency declared on February 29th, 2020 and issued on May 11, 2020. Independent review by FDA is not required and performed. This test is used for clinical purposes and should not be regarded as investigational or for research.
